
2015 and 2016
2017
2018
lower bound, B = 0
Training set
1481 / 812 / 1141 isolates
Gradient boosted trees
threshold t at 90%
sensitivity on held out data
bought labels join the training set,
then f and t are refitted
one round of four
about 520 / 320 / 360 isolates arrive per round
scores
Score
f(x)
Rank by rule
random, uncertainty,
diversity, hybrid
top B/4
Laboratory AST
on B/4 isolates
the rest, untested
Reported from f(x) and t
very major errors (VME)
major errors (ME)
after 4 rounds
Evaluate on 2018
1386 / 775 / 1204 isolates
AUROC and TreeSHAP
upper bound, B = all
